Summary

4th-year Computer Science (IoT) student with hands-on experience in **backend development, REST APIs, Node.js, Express.js, SQL, and databases**. Experienced in building **server-side applications**, CRUD operations, request validation, error handling, HTTP status codes, and modular API/data layers. Strong foundation in **JavaScript, Java, Python, DBMS, Object-Oriented Programming, and Data Structures & Algorithms**, with **180+ problems solved on LeetCode**.

Experience

Backend Engineering Intern

Jul 2026 – Aug 2026

FlyRank AI (Remote)

- Developed and maintained **RESTful APIs** using **Node.js and Express.js**, integrating **SQLite/SQL** for persistent storage
- Implemented complete **CRUD operations**, request validation, error handling, and proper HTTP status codes
- Applied backend best practices including modular code, separation of API/data layers, and **Git-based version control**

Data Analyst Intern

May 2026 – Jul 2026

Bluestock Fintech (Remote)

- Performed **data processing, transformation, and validation** on fintech/stock-market datasets using **Python, Pandas, SQL, CSV/JSON, and Excel**
- Built an interactive **Power BI dashboard** as part of a capstone project to visualize and communicate data insights

Coding Content & Mentorship

- Curated a **DSA practice question set** across topics and difficulty levels for juniors and mentored peers in coding & DSA
- SWOC 2024 Contributor**: Reviewed code and identified edge cases/test scenarios to strengthen test coverage and reliability

Technical Skills

Languages: JavaScript, Python, Java, C/C++, SQL

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs

Databases: SQLite, MySQL, MongoDB

Authentication & Authorization: JWT

Core: Object-Oriented Programming, DBMS, Data Structures & Algorithms, Git, GitHub

Projects

Jansunwai AI Portal | *Node.js, Express.js, React.js, Supabase, Gemini, Tailwind CSS* | [Live](#)

Apr 2026 – May 2026

- Built a civic grievance platform with **Node.js and Express.js** backend APIs for automated complaint classification, priority scoring, department routing, and SLA-based escalation
- Integrated structured complaint data with **Supabase** and developed real-time workload analytics for administrative users
- Implemented **asynchronous backend processing** for concurrent complaint submissions and bilingual citizen notifications

NeuroTrack AI | *Python, Flask, OpenCV, Scikit-learn, REST APIs* | [Live](#)

May 2026 – Jul 2026

- Built a real-time multimodal **data processing pipeline** collecting and aggregating behavioural telemetry including keystrokes, mouse activity, browser context, and facial features
- Developed a **Python Flask REST service** to process incoming telemetry, extract features, and generate cognitive-load, productivity, and fatigue scores

Education

Shri Ramswaroop Memorial University, Barabanki, UP

2023 – 2027

B.Tech, Computer Science (IoT)

Achievements

APL Hackathon Finalist (Team Lead): Advanced from 150+ competing teams to top 24; led system architecture and team execution

Smart India Hackathon (SIH) 2025: Participated in rapid full-stack development under national-level competition constraints

Competitive Programming: 190+ problems solved on LeetCode

Certifications

AWS APAC Solutions Architecture Job Simulation — EC2, S3, and core cloud infrastructure design

Anthropic — AI Fluency: Framework and Foundations

L&T EduTech — Python Programming & Web Development
